

# frogs

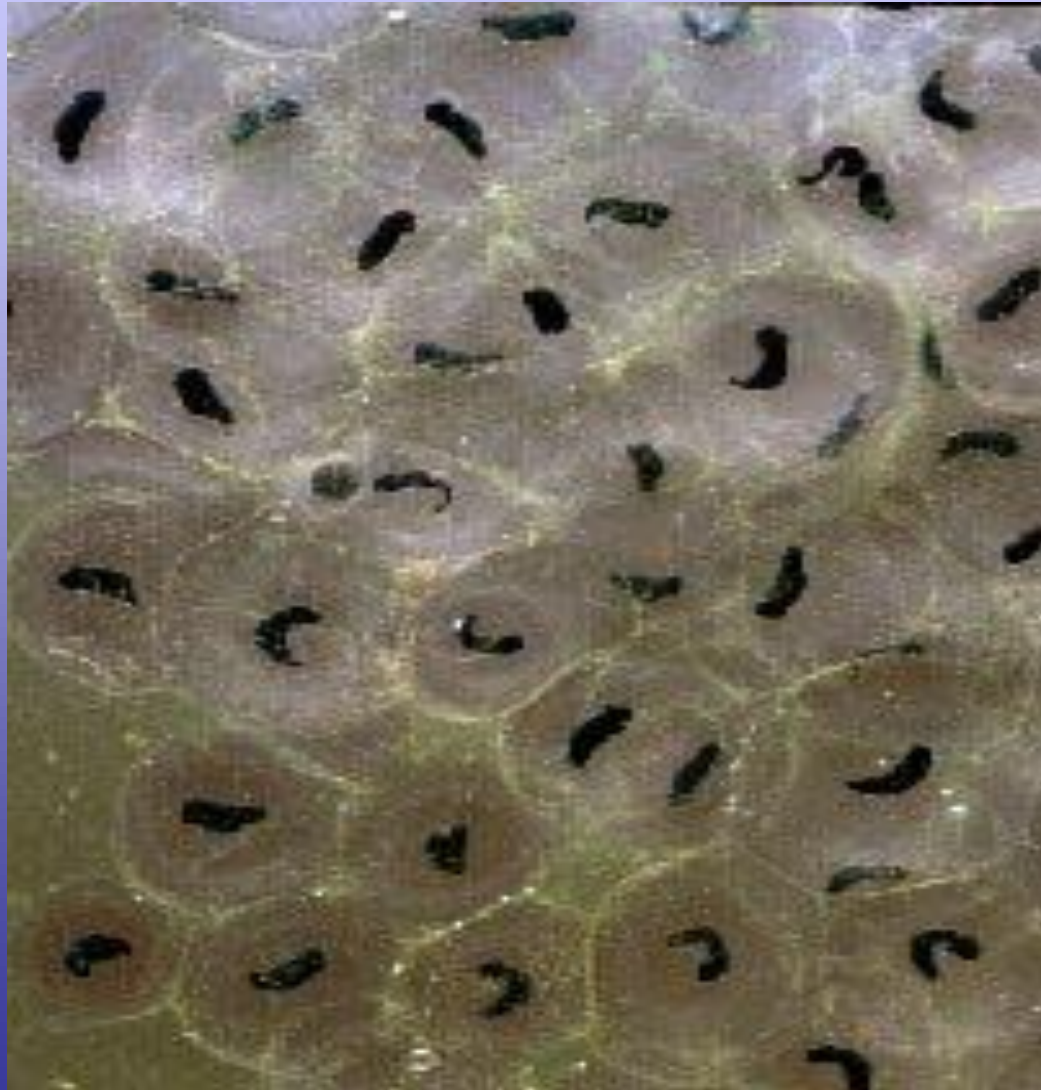

'Mummy, where did I come from?'

**Mummy frog lays lots of eggs  
in the water.**

**frog spawn**

**Soon the eggs begin to change.**

**Can you see the head?**

**They get longer.**

**Soon they leave the jelly.**

They have big heads and long tails.

They use gills to breathe.

tadpoles

**They eat water plants.**

**Soon they don't need gills anymore.**

**They come to the top of the water to breathe air.**

**They grow legs.**

**The back legs grow first.**

**Then 1 front leg grows.....**

...and the other front leg.

It still has a long tail.

**The tail begins to shrink.**

**Look how short the tail is now.**

No tail is left.

frog

'Rebbit  
rebbit'
